SHANUKA B. HERATH

COMPUTER SCIENCE GRADUATE

Software Development | AI Applications | Application Security

Sri Lanka • +94 777 497 379 • shanbhera@gmail.com
GitHub • LinkedIn

PROFESSIONAL PROFILE

Computer Science graduate (Second Class Upper Division) with hands-on project experience across full-stack web, Android, and desktop application development, AI integration, and application security. Builds practical solutions using Python, FastAPI, React, databases, Docker, and DevSecOps tooling, with a focus on secure development workflows and user-centred applications.

TECHNICAL SKILLS

Programming & web Python, Java, Kotlin, JavaScript, HTML, CSS, PHP, React
Backend & data FastAPI, REST APIs, MongoDB, SQLite, MySQL, Room DB
AI & application security Gemini API, AI image editing, Bandit, Gitleaks, Trivy, Burp Suite (in progress), Scapy, AES
Engineering & tools Docker, Git, GitHub, pytest, Ruff, mypy, Android Studio, WAMP

WORK EXPERIENCE

Graphic Designer | Multimedia Studio *Apr 2023 - Oct 2023 | 6 months*

- Designed marketing materials, social media posts, banners, flyers, and promotional graphics for clients.
- Worked with clients and team members to understand requirements and deliver creative solutions consistent with brand guidelines.
- Managed multiple design tasks, incorporated client feedback, and met delivery deadlines.

EDUCATION

BSc (Hons) in Computer Science - Second Class Upper Division | University of Bedfordshire
Higher National Diploma (HND) in Information Technology | SCU - SLIIT City Uni
GCE Advanced Level - Science | Sir John Kothalawala College
GCE Ordinary Level - English Medium | Athugalpura Prince College

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Certified Artificial Intelligence Security & Risk (CAISR) - Red Team Leaders
- AI Concepts for Developers and Technology Professionals - Microsoft
- Introduction to DevOps and Site Reliability Engineering (LFS162) - Linux Foundation
- Future in Quality Assurance - ARCSCU 2025 Conference (Workshop)
- Cybersecurity / Burp Suite - PortSwigger (in progress)

SELECTED SOFTWARE PROJECTS

AESA - AI Execution Security Agent | *Python, FastAPI, React, Docker, SQLite, Git*

- Designed an AI-assisted repository analysis and secure code-change workflow with controlled execution and human approval.
- Integrated pytest, Ruff, mypy, Bandit, Gitleaks, and Trivy checks with Docker sandbox isolation, Git feature branches, and CI/CD security gates.

PhotoSphere - AI-Based Photo Editing Web Application | *Python, FastAPI, React, Gemini API, MongoDB*

- Built an AI photo-editing application supporting Sinhala text and voice prompts, icon-based editing, and multi-action prompting.
- Integrated AI image editing and undo/redo history to support a more controlled editing experience.

Game Security Lab - DevSecOps Project | *GitHub Actions, CodeQL, Semgrep, Gitleaks, SBOM, Trivy, Kubernetes*

- Completed a hands-on DevSecOps project focused on securing game development and software release workflows.
- Applied CI security controls, source and secret scanning, software supply-chain security, container and infrastructure checks, deployment controls, and runtime monitoring.

Additional Projects Cybersecurity utilities (Python, Scapy, AES); Android Personal Expense Tracker (Java/Kotlin, Room DB); Healthcare Appointment System (Java Swing, MongoDB); Black Pepper e-commerce website (PHP, MySQL); The Great Outdoors team e-commerce project (MERN).
